At a Glance

Superior Pads & Abrasives® Catalog outlines key features and technical specs along with the available variety for every product category so distributors can ensure they are getting the right products for their customers.

This catalog offers the complete range of premium quality Superior Pads & Abrasives® products in one place to make your selection effective and convenient. All the products are divided into 7 broad categories for easier access to what you're looking for.

You can also head to our online store at www.superiorpads.us for product catalog in PDF format, downloadable content, product specifications and online ordering. All of the information you need is just a few clicks away.

Exceeding Customer Expectations

We strive to operate with integrity, achieve our mission in an ethical manner and continually improve our products

SANDING PADS

Superior Pads & Abrasives® offers a wide range of sanding pads which serves a variety of finishing applications. These sanding pads feature Hook & Loop or Pressure Sensitive Adhesive (PSA) backs for easy and quick sandpaper replacement.

Craftsmen can now bring convenience to their craft with Superior Pads & Abrasives® sanding pads featuring high quality materials and durable construction.

Superior Pads & Abrasives offers variety of sanding pads in following sizes:

4" 5" 6" 7"

Always use respiratory protection when exposure to contaminants exceeds applicable threshold limit.

Ear protection must be worn when exposure to sound exceeds applicable threshold limit.

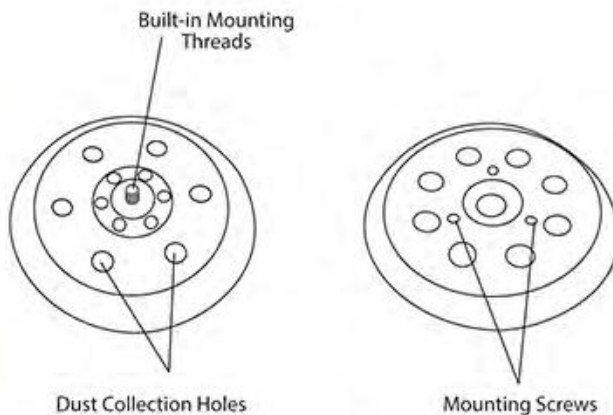

Eye protection must be worn at all times.

Easy Installation

Superior Pads & Abrasives® offers its range of sanding pads with either screw on or built-in mounting threads for easy and quick installation. The pad can be attached firmly to the sander with convenience using either of the mechanisms for achieving perfect results.

Quick Replacement Pads with Hook & Loop / PSA Backs

Superior Pads & Abrasives® sanding pads either come with a Hook & Loop or Pressure Sensitive Adhesive (PSA) backing. Hook & Loop functions like a Velcro so it becomes really easy to switch between different sanding grits of paper. On the other hand, PSA backing pads have a smooth surface for a stick-on sanding paper to be attached to the surface of the pad when the pressure is applied. This mechanism works like a reusable sticker, so it's quite easy to replace this type of sanding paper as well.

Dust Collection

Sanding leads to quite a bit of dust generation that can become a hassle. Apart from messing up the environment, having dust on your pad can also result in performance degradation of your tool and less than ideal results. That's why Superior Pads & Abrasives® offers majority of its pads with up to 8 holes for effective dust collection.

**STAND OUT.
BUY SUPERIOR.**

We Mean Business

Perfect your brick and mortar & online stores with our Superior Pads & Abrasives® products

We know that you take your job seriously – and we are serious about providing you with the products to get that job done. Without the right product, you're working harder than you have to. Our products have all been developed for you, to meet and exceed your needs. When you buy a SPA product, you can be confident that we have put as much thought into it as you would. We mean long life. We mean efficient performance. We mean innovative solutions.

BACKING PADS

Superior Pads & Abrasives® manufactures an exceptional range of high quality backing pads that give benchmark performance in all DIY and professional jobs. With a built of premium materials and engineered to give excellent results, Superior Pads & Abrasives® backing pads provide exceptional quality,

performance and value and can be used with many brand name sanders and polishers for different types of finishing jobs.

Superior Pads & Abrasives® offers its backing pads in 4.5" and 7" variations for diverse range of applications.

Superior Pads & Abrasives offers a variety of backing pads in following sizes:

4.5" & 7"

Always use respiratory protection when exposure to contaminants exceeds applicable threshold limit.

Ear protection must be worn when exposure to sound exceeds applicable threshold limit.

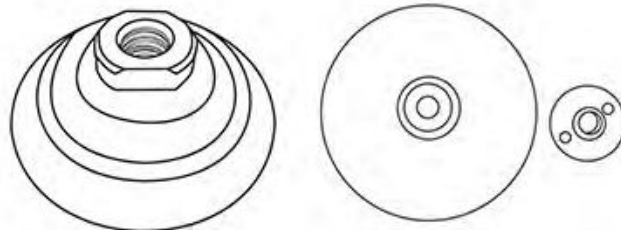

Eye protection must be worn at all times.

Easy Installation

All of the Superior Pads & Abrasives® backing pads come with a built in mounting thread or locking nut mechanism for quick and convenient installation. The backing pad can be conveniently attached to the sander or polisher in a firm manner using either the locking nut or threaded mount so you can get the best performance from your power tool.

This also makes it quite easy and quick to replace and switch between different backing pads reducing the down time and increasing the productivity.

Durable Construction

Superior Pads & Abrasives® backing pads are either made of high quality rubber or durable propylene material. Both materials offer the ability to handle heavy duty tasks and are capable of being sturdy and tough as well as flexible according to the nature of the finishing task at hand.

Variety in Size

Different types of finishing jobs need different sizes of backing pads for optimum results. That's why Superior Pads & Abrasives® offers its range in 4.5" and 7" variations to address all kinds of tasks with ease.

High Performance

The range of Superior Pads & Abrasives® backing pads can support between various RPM ratings depending on the diameter and application of the pad.

We Innovate

Perfect your brick and mortar & online stores with our Superior Pads & Abrasives® products

With more than decade of experience in designing and manufacturing high quality sanding and finishing solutions particularly tailored for modern woodworkers, SPA has established itself as a front line manufacturer that delivers durability and performance every day of the week.

All SPA products comply with our vigorous quality assurance standards for benchmark quality so consumers end up with a flawless product.

BUFFING & POLISHING PADS

Superior Pads & Abrasives® produces and distributes a premium range of buffing and polishing pads that give outstanding results in all working environments be it a DIY or a professional job. Built with high quality materials and designed to achieve excellence, Superior Pads & Abrasives® buffing and polishing pads provide exceptional quality, lasting performance at a great

value. These buffing and polishing pads can be used with many brand name sanders and polishers for different types of finishing jobs.

Superior Pads & Abrasives® offers its buffing and polishing pads in 6" and 8" variations to accomplish a diverse range of tasks.

Superior Pads & Abrasives offers a variety of buffing/polishing pads in following sizes:

6" & 8"

Always use respiratory protection when exposure to contaminants exceeds applicable threshold limit.

Ear protection must be worn when exposure to sound exceeds applicable threshold limit.

Eye protection must be worn at all times.

UNC Thread Mount

All of the Superior Pads & Abrasives® buffing and polishing pads come with a built in UNC (Unified National Coarse) mounting thread for quick and convenient installation. These pads can be conveniently attached to the sander or polisher in a firm manner using the 5/8"-11 UNC female threads so you can get the best performance out of your power tool.

This also makes it quite easy and quick to replace and switch between different buffing/polishing pads reducing the down time and increasing the productivity.

Premium Construction

These pads are made of high quality materials to offer the ability to handle heavy duty tasks and are capable of being sturdy and tough as well as flexible according to the nature of the finishing task at hand.

Variety in Size

Different types of polishing jobs need different sizes of buffing/polishing pads for best in class results. That's why Superior Pads & Abrasives® offers its range in 6" as well as 8" variations so craftsmen can address all kinds of tasks with ease.

Heavy Duty Performance

The range of Superior Pads & Abrasives® buffing/polishing pads can support between various RPM ratings depending on the diameter and application of the pad. These pads are great for scratch removal, sand scratch removal, paint defects, medium paint finishes and many more applications.

SURFACE CONDITIONING DISCS

Superior Pads & Abrasives® produces and distributes premium quality surface conditioning discs that are great for achieving optimum performance in all medium to heavy duty jobs. Featuring high quality materials, sturdy built and lasting durability,

Superior Pads & Abrasives® offers its surface conditioning discs in 2" and 3" variations to serve different finishing tasks.

Superior Pads & Abrasives offers a variety of surface conditioning discs in following sizes:

2" & 3"

Always use respiratory protection when exposure to contaminants exceeds applicable threshold limit.

Ear protection must be worn when exposure to sound exceeds applicable threshold limit.

Eye protection must be worn at all times.

Easy Installation

All of the Superior Pads & Abrasives® surface conditioning discs come with roll on and roll off mechanism for quick and convenient installation. Conditioning Discs also come in kits with 1/4" shank and lock-on pad. It is quite easy and quick to attach the conditioning disc to the roll on / off disc.

This also makes it convenient to replace and switch between different surface conditioning discs reducing the down time and increasing the productivity.

Fine Grit

Medium Grit

Coarse Grit

Durable Construction

Superior Pads & Abrasives® conditioning discs are made of high quality non-woven materials so they can last long and hold their own in most demanding tasks. These materials are sturdy enough to handle heavy duty tasks and are capable of producing excellent results consistently during long jobs.

Variety in Grit

Different types of finishing jobs need different types of grits for best possible results. That's why Superior Pads & Abrasives® offers its range in fine, coarse and medium variations to address all kinds of tasks with ease. With coarse discs you can sand your way through rougher surface areas removing large amount of material while fine discs are great for giving your projects a final touch.

Applications

Superior Pads & Abrasives® surface conditioning discs have many applications in both the automotive and industrial areas. These are durable non-woven abrasives used for light grinding, paint removal and blending applications providing a burr-free finish.

NOTHING
BUT PREMIUM

We Create Quality

Perfect your brick and mortar &
online stores with our Superior
Pads & Abrasives® products

When it's about work, craftsmen don't want to hold back. They want nothing but the best and Superior Pads & Abrasives® gets it. We create products that are in their own league in terms of quality and value so craftsmen can do their job without any hassles.

And it isn't only about the quality of the product itself but also about the quality of work you achieve with it.

HAND SANDING BLOCK

Superior Pads & Abrasives® offers a high quality sanding block with rectangular dimensions and rubber grip for ultimate performance. This sanding block can securely hold any type of sandpaper for different kinds of sanding applications including wet and dry sanding.

This sanding block is capable of taking 2-3/4" x 9" sandpaper for DIY and professional jobs.

Superior Pads & Abrasives sanding block dimensions are:
2.75" x 5" and it takes 2.75" x 9" sandpaper

Always use respiratory protection when exposure to contaminants exceeds applicable threshold limit.

Ear protection must be worn when exposure to sound exceeds applicable threshold limit.

Eye protection must be worn at all times.

Comfortable Grip

Superior Pads & Abrasives® hand sanding block features an ergonomic and comfortable grip made of high quality rubber for long tedious sanding jobs. Convenient grip keeps the operator from getting fatigued and helps in maintaining consistent performance over longer periods.

Light & Compact

This sanding block has compact dimensions of just 2.75" x 5" so it is easy to hold even if you have small hands. It's light, compact and sturdy profile makes it a great performer for heavy duty tasks.

Excellent Performance

Superior Pads & Abrasives® gives you a 5" long pliable rubber sanding block that can securely hold sandpaper during wet or dry sanding. The sanding block is also capable of yielding four strips from a standard size 9" x 11" piece of sandpaper.

Compatible with

HAND SANDING BLOCK

Premium quality only crafted for your skilled hands

Model: SB50

Rectangle Sanding Block

Features:

- Size - 2.75" x 5"
- Ergonomically designed rubber material for comfortable grip

PRECISION PERFORMANCE

We Pursue Performance

With our products, create
results that impress & inspire

Every product can give results but SPA products do one better and aim for performance that evokes precision in your projects. We are aware you cherish your work, that's why we are always pursuing products that help you enjoy your craft.

Nothing beats a product that is designed with your desires in mind and every SPA product is a true reflection of those

SANDING SLEEVES, DRUM KITS & ACCESSORIES

Superior Pads & Abrasives® offers an exceptional range of high quality Sanding Sleeves and Drum Kits for use with portable electric drills, flexible shafts and drill presses. These sleeves and drum kits enhance the capabilities of power tools and the range of applications you can accomplish with them.

With premium build, industry leading performance and lasting durability, Superior Pads & Abrasives® sanding sleeves and drum kits provide a compelling solution for heavy duty sanding needs of any professional craftsman.

All sanding sleeves, drum kits and accessories are available in various sizes to better fit diverse applications.

Always use respiratory protection when exposure to contaminants exceeds applicable threshold limit.

Ear protection must be worn when exposure to sound exceeds applicable threshold limit.

Eye protection must be worn at all times.

Heavy Duty Sanding

Superior Pads & Abrasives® drum kits feature Aluminum Oxide resin for robust durability and aggressive heavy duty sanding applications. These drum kits can achieve a fast cut and provide exceptional tolerance for heavy-weight metal applications such as weld grinding, beveling, flame-cut edge cleanup and deburring rough areas of ferrous metals.

Versatility

All of the Superior Pads & Abrasives® sanding drums are cushioned and self expanding so they can automatically adjust to the task at hand. Ability to self expand brings convenience to the job as operator doesn't have to maneuver the work piece to get the perfect sanding results.

Adhesive Free Application

Superior Pads & Abrasives® sanding drums come with innovative friction fit design that eliminates the need of any adhesive. This feature allows for quick and convenient drum replacements.

Grit Variety

To address diverse nature of sanding applications, the range of Superior Pads & Abrasives® sanding sleeves comes in all grit varieties including fine, medium and coarse for better suited results.

Size Variety

Superior Pads & Abrasives® sanding drum kits are available in different drum and shank diameters for a range of applications including sanding holes, edges, contours, irregular shapes and wider surfaces.

Other Sanding Accessories

Apart from sleeves and drum kits, Superior Pads & Abrasives® also offers:

- Belt Cleaners with and without plastic handle for enhanced belt life
- Lathe Buffing Arbor
- 3 piece Buffing Wheel Set with 8" diameter and 3/4" shaft hole

ABRASIVE SANDING BELT CLEANERS

Pull off wonders with superior products you deserve

Our abrasive cleaner sticks are the easiest solution for cleaning/unloading abrasives. Increase the life of new sanding belts and discs up to 10 times as long with our quality abrasive belt cleaners. Simply press the cleaner stick lightly against moving sanding belts and discs to remove clogged-up pitch and saw dust. Improves the finish quality and prevents burns and marking. Cuts down the frequency and costs of belt replacement.

Model: 19544, 19547, 19549, 19551

Abrasive Sanding Belt Cleaners

Features:

- 19551: 1-1/2" x 1-1/2" x 6"
